Kindergarten Term 3

If you walk into any kindergarten classroom you will notice that the fabulous artworks and writing on Farm animals have been taken down and in their place interesting works on mini beasts are being displayed.

The students are busy little bees at the moment, learning how to write succinct procedures and descriptive information reports this term.

The L3 program has continued with success and the Kindergarten teachers would like to thank the many parents that have volunteered their time to assist in activities. The students have also presented many great news items this term. The preparation for these talks is evident.

Working in pairs and small groups, the students are busy increasing their knowledge in many mathematics subjects. Still to come are the following mathematics lessons - addition, subtraction, data, graphs, groups of, sharing, length, numeral ordering, 3D objects, time, 2D shapes, position and direction.

The students have enjoyed learning some funky moves this term through the Moving Bodies dance program. Dance floors watch out!

This term, the students will participate in their first Wahroonga K-2 Sports Fun day. On Wednesday 29 August, the students will need to wear their sport uniform and bring a water bottle. They will participate in activities such as, egg and spoon races, basketball, hockey, and soccer. This fun day will be the first occasion for the kindergarten students to meet their fellow 'house mates' from Year 1 and Year 2. The K-2 Sports Fun Day aims to promote many wonderful values, including the spirit of having a go, being a good sport and celebrating the efforts of others and themselves.

And finally, the students are enjoying refining their item for the concert at the end of the term. Hope to see you all there!

Kristy Johnson

Kindergarten Assistant Principal
